

**Cora School Recycling League
Award Ceremony
10 November 2025**

**Speech by Tetra Pak Asia Southeast Asia, HR Country Services
Leader APAC & Site Director Singapore**

Good morning, everyone!

It's a pleasure to be here today at the Cora School Recycling League Award Ceremony. On behalf of all of us at Tetra Pak, I'd like to thank Cora Environment for organizing this meaningful initiative and for inviting us to be part of it.

A GREAT FIRST-YEAR ACHIEVEMENT

This past year has been an exciting and fulfilling journey. We're proud to share that, together with your support, we've collected an impressive 490 kilograms of used beverage cartons in our very first year of participation. That's 490 kilograms of valuable material given a second life, it's a fantastic achievement that we should all be proud of.

TETRA PAK'S OBJECTIVE TO JOIN THE SCHOOL RECYCLING LEAGUE

At Tetra Pak, we've long been committed to promoting beverage carton circularity. For many years, we've been working to raise awareness, improve recycling infrastructure, and support initiatives that help keep cartons in use and out of landfills. This program is a wonderful extension of that mission. Working with like-minded organizations like Cora Environment allows us to make a greater impact together – driving real progress in the collection and recycling of beverage cartons across Singapore.

EXPERIENCE OF PARTICIPATING IN SCHOOL TALKS

One of the most rewarding parts of this journey has been engaging directly with students. We've had the opportunity to participate in school talks, where we shared more about Tetra Pak's mission and the recyclability of our cartons. It was incredibly heartening to see the students' enthusiasm and curiosity. They did not only learn about the recyclability of cartons but also practiced with actions – especially by following the 3Fs of carton recycling: Flip, Flap, and Flatten.

THANKING THE SCHOOLS FOR THEIR EFFORTS

To all the schools that participated, thank you. Whether you're taking home a prize today or not, your efforts have made a real difference. By actively segregating and recycling beverage cartons, you've helped give these materials a second life and

contributed to a more sustainable future. And to the winning schools – congratulations! We hope you enjoy your prize – a beautiful furniture set (one small table and 4 colourful stools), which is made from recycled beverage cartons. It's more than just a reward – it's a tangible testament to your efforts and a symbol of how we can keep valuable materials in use through a circular economy.

Let's continue working together to build a greener, more sustainable Singapore, one carton at a time!
